Chapter 1: Access to evidence

The left column describes the observation before the comparison. A library count measures visible use. An interview records reasons for absence and uncertainty about services.

The right column draws the conclusion after the observation. Different sources answer different questions. More visits alone cannot identify the cause of a change in reading.

Chapter 2: Comparing explanations

The left column describes the observation before the comparison. A library count measures visible use. An interview records reasons for absence and uncertainty about services.

The right column draws the conclusion after the observation. Different sources answer different questions. More visits alone cannot identify the cause of a change in reading.
